

IODA s.r.l.

*Hard resin progressive lenses, Index 1,498 uncoated. AltWorks.*

Altworks is a modern progressive lens with an ample zone for far but most of all, a wide canal that connects in only 16mm this area to the area for near.

**Easy to use!** AltWorks is an ideal lens for the first presbyopes but which causes immediate enthusiasm of who, having used until now bifocal lenses, discovers a new dynamic vision. The balance between the different areas (far, intermediate and near) makes this progressive lens extremely comfortable.

We have made this lens agreeable, studying particularly plane curves so as to improve the lens aesthetically but at the same time, we have the further advantage of reduced weight and thickness, thus increasing the total comfort of the product.

**Finished lenses** are produced directly by polymerization and guarantee the highest quality of the image.

Lense diameter 70mm.  
Range : far power between 0,00 to + 3,00,  
addition between 1,00 to 3,50 dioptries.

*Hard resin bifocal lenses, Index 1,498 uncoated. Flat Top*
